

## **Bradford Pear Replacement Plan**

**First Colony will begin work on this year's phase of the Bradford Pear replacement plan. We will remove a total of 18 Bradford pears on the 2 esplanades on Austin Parkway to facilitate the planting of 6 groupings of trees in this area. The groupings will consist of 1 Mexican white oak, 1 Drummond red maple and 3 "Muskogee" crapemyrtles to match the plantings on the esplanades that have already been completed on Austin Parkway. We anticipate beginning this work in late April.**
